Labs

- In MCLD 410.
- There are 8 sections, 2 hours each. Check:
<https://courses.students.ubc.ca/cs/main?pname=subjarea&tname=subjareas&req=3&dept=CPEN&course=312>
 - L2A Mon: 5:00 PM to 7:00 PM
 - L2B Mon: 9:00 AM to 11:00 AM
 - L2C Wed: 5:00 PM to 7:00 PM
 - L2D Wed: 2:00 PM to 4:00 PM
 - L2E Thu: 3:30 PM to 5:30 PM
 - L2F Tue: 3:00 PM to 5:00 PM
 - L2J Tue: 5:00 PM to 7:00 PM
 - L2K Mon: 2:00 PM to 4:00 PM
- Labs are for demonstration of work only. You are not supposed to do the lab assignments in the lab, except for lab 1 (maybe).

First Part of the Course: Reference Textbooks

- Most books on digital logic are good for the first part of this course! For your reference here are some books I like:
 - Fundamentals of Digital Logic with VHDL Design By Brown & Vranesic, 3rd Edition.
 - Digital Electronics by Kleitz, 7th Edition.
 - Digital Design by Mano and Ciletti, 5th Edition.
 - Digital Fundamentals by Floyd, 10th Edition.

L01: Course Introduction.

5

Second Part of the Course: Required Manual

- The MCS-51 Microcontroller user's manual will be our reference for the second half of the course. Chapters 1, 2, and 3 only!
- The final exam will be open book.
 - Sharing of material will not be allowed.
 - Printed material only. Electronic devices will not be allowed.
- Available on Connect

L01: Course Introduction.

6

Copyright © 2009-2019, Jesus Calvino-Fraga. Not to be copied, used, or revised without explicit written permission from the copyright owner.

Second Part of the Course: Reference Textbook

Using the MCS-51
Microcontroller, Han-Way Huang,
Oxford University Press, 1st
edition/December 16, 1999,
0195125134.

L01: Course Introduction.

7

Course Evaluation

The course evaluation consists of two exams and five lab assignments:

Evaluation:	Due Date:	Worth:
Lab 0: Mandatory safety training	Week of January 14	0%
Lab 1: Logic design using discrete gates	Week of January 28	3%
Lab 2: Arithmetic Circuits	Week of February 11	4%
Lab 3: Flip/Flops and Counters	Week of February 25	5%
Midterm Exam (1:30h)	February 27	35%
Lab 4: Arithmetic in assembly	Week of March 11	4%
Lab 5: Timers/Counters Applications	Week of March 25	4%
Final Exam	TBA: Sometime in April	45%

L01: Course Introduction.

9

Exams

- The midterm exam covers only the first part of the course.
- The final exam covers only the second part of the course. The final exam will be open book.

L01: Course Introduction.

10

Copyright © 2009-2019, Jesus Calvino-Fraga. Not to be copied, used, or revised without explicit written permission from the copyright owner.

Lab Assignments

- Each Lab assignment is to be demoed in the laboratory: you work at home, come to the lab, demonstrate your work, get a mark, and leave. You are not supposed to do the whole lab assignment in the lab! (Exception: lab 1 if you don't own a breadboard)
- Lab work is individual. No group submissions.
- Absolutely no late labs. Late lab=0%. Normal exceptions (medical, for example) apply.

L01: Course Introduction.

11

IMPORTANT: To pass the course:

- You must get a grade of at least 40% in each of the Digital AND for the Microcomputers exam in order to pass the course.

AND

- You must get a average exam grade of at least 50%

AND

- You must also get an aggregate mark of at least 50% overall

AND

- You must get at least 40% average in the labs.

L01: Course Introduction.

Examples:

- Labs 38%, Midterm 100%, Final 80%: **FAIL** (labs are below 40%). Final grade=47%.
- Labs 90%, Midterm 95%, Final 35%: **FAIL** (Final exam is below 40%). Final grade=47%.
- Labs 52%, Midterm 62%, Final 48%: **PASS**. Final grade=53%.
- Labs 75%, Midterm 55%, Final 42%: **FAIL** (Exams average < 50%). Final grade=47%.
- Labs 85%, Midterm 60%, Final 40%: **FAIL** (Exams average < 50%, $60*30\% + 40*40\% = 34\% < 35\%$), Final grade=47%.
- Labs 42%, Midterm 60%, Final 44% = **FAIL** (Aggregate is below 50%: $42*0.3+60*0.3+44*0.4=48\%$)

L01: Course Introduction.

Lecture Schedule

- The Course is divided into two parts:
 - First Part: Digital Logic. From January 2 to February 16. Midterm exam covers this part.
 - Second Part: Microcomputers. From March 1 to April 3. Final exam covers this part ONLY.
 - (Is the last day of classes April 4th???)

First Part: Digital Logic

Lecture	Description	Date
1	Course Introduction.	Jan 2
2	Number Representation.	Jan 2/4
3	Binary Logic and Gate Implementations	Jan 9
4	Boolean Algebra	Jan 11
5	Reduction Techniques	Jan 16/18
6	Introduction to VHDL	Jan 25
7	Arithmetic Circuits	Jan 25/30
8	Code Converters, Mux, De-Mux	Feb 1
9	ALU, Flip-Flops and Registers	Feb 6
10	Synchronous Counters	Feb 8
11	Finite State Machines	Feb 13/15

L01: Course Introduction.

16

Second Part: Microcomputers.

Lecture	Description	Date
12	Introduction to 8051 Assembly I	March 1
13	Introduction to 8051 Assembly II	March 6
14	Integer Arithmetic I	March 8
15	Integer Arithmetic II	March 13
16	Memory	March 15
17	I/O Ports	March 20
18	Timers and Counters	March 22
19	Interrupts	March 27
20	Serial Port	March 29
21	Serial Peripheral Interface (time permitting!)	April 3

Statistics from last January 2018

- Number of students in course: 155
 - IGEN: 59
 - ENPH: 64
 - MECH: 32
- Number of students that failed: 34 (21.9%)
 - IGEN: 27 (45.7%)
 - ENPH: 5 (7.81%)
 - MECH: 2 (6.25%)

Statistics from last January 2018

- Number of students with A+: 27 (17.42%)
 - IGEN: 1 (1.69%)
 - ENPH: 16 (25%)
 - MECH: 10 (31.25%)
- Class average: 69.52%
 - IGEN: 54.5%
 - ENPH: 78.8%
 - MECH: 78.6%

Assumptions About the Course

- You have done or you are doing a programming course equivalent to APSC 160, e.g. C/C++, Python, or Java programming. If not, then you will probably fail the course.
- You know basic electrical concepts: voltage, current, resistance, insulators, conductors: concepts that you did in Grade 12 Physics.
